VISIT “DOS MANGAS” WATERFALLS

The name Dos Mangas comes from the times in which the people of the community called the rivers, Mangas, and near the town, there was a joint of two river streams, Grande and Coin. The Native flora, which characterizes the forest of guadua (bamboo), shows us the generous nature of the sector. As you walk the paths, it is possible to find a large amount of orchids, bromelías and Heliconias. The paths also allow the observation of birds such as toucans, tángara and pájaro brujo (wizards bird). Over 82 species of birds can be identified in this area. A variety of amphibians, reptiles, and invertebrate, plus 21 native species of mammals can also be observed. The route can be done to horses or with a interesting walk through the various trails that lead us to know the different ways of working that has the community, such as planting and harvesting of Toquilla straw, the guidance and more.

DEPARTURE: 8:00 am and 14:00

VISIT A LA ISLA DE LA PLATA

Also known as the “Miniature Galapagos”, is one of the most important places of the Machalilla National Park. From prehistoric times it was used as a place for worshipping the Sun and the exchange of the famous Spondylus seashell. It also served as a refugee place for pirates and corsairs, and it is said that under its waters tons of silver treasures were submerged, thus its names. Currently the most important is to be a nesting site for sea birds such as blue-footed boobies, masked and red footed boobies, frigates, tropic birds and albatrosses. It covers an area of 1,200 hectares, but only has two walking trails enabled approximately 3 miles. Walking times is approximately 3 hours. The visit to the island is always accompanied by a licensed naturalist guide.
